# Jetstream Overview: A national research and education cloud

## **UC Professional Development Workshop**

**January 29, 2021 – Bloomington, IN (Webinar)**

**Sanjana Sudarshan, PhD – [ssudarsh@iu.edu](mailto:ssudarsh@iu.edu)**

Senior Technical Advisor, Jetstream Cloud

UITS Research Technologies

Indiana University

Sudarshan, S. (2021). Jetstream: A national research and education cloud. Retrieved from <https://jetstream-cloud.org/research/publications.php>

# NSF Funding Areas in HPC

Traditionally concentrated on enabling petascale capability

- Blue Waters – 13.3 petaflops, 2012 (Frontera awarded late 2018 )
- Stampede – 9.6 petaflops, 2013 (extended to Stampede2 in 2017 – 18 petaflops)
- Comet – ~2.0 petaflops, 2014

Has funded research into building clouds and computer science

- CloudLab (renewed for 2nd phase)
- Chameleon (renewed for 2nd phase)

Now funding clouds to do research

- Bridges (Hybrid system)
- Jetstream (extended to Jetstream2)

# Expanding NSF XD's reach and impact

Around 350,000 researchers, educators, & learners received NSF support in 2015

- **Less than 2%** completed a computation, data analysis, or visualization task on XD/XSEDE program resources
- Less than **4%** had an XSEDE Portal account
- **70%** of researchers surveyed\* claimed to be **resource constrained**

Why are the people not using XD/XSEDE systems not using them?

- Perceived **ease of access** and use
- HPC resources – the traditional view of what XSEDE offers - are often **not well-matched** to their needs
- They just don't need *that much* capability

\*XSEDE Cloud Survey Report - <http://hdl.handle.net/2142/45766>

“But I really don’t have research needs...I don’t need the national research cyberinfrastructure.”

– multiple researchers at small colleges and universities

Sarah Romanes @sarah\_romanec · Mar 17

When you have to drive to work - but R has also only completed 10hrs of 24hrs worth of simulations. Can I go in the T2 lane with this thing? 😂 #rstats #sydneytraffic

**RESEARCH TECHNOLOGIES**  
UNIVERSITY INFORMATION TECHNOLOGY SERVICES

# What is Jetstream and why does it exist?

- NSF's first production cloud facility
- Focus on ease-of-use, broad accessibility
- User-selectable library of preconfigured virtual machines
- Provides **on-demand** *interactive* computing and analysis or persistent services such as gateways
- Enables **configurable** environments; *programmable cyberinfrastructure*
- Reproducibility

# Who uses Jetstream?

- The researcher needing a handful of cores (1 to 44 vCPUs)
- Software creators and researchers needing to create their own VMs and workflows
- Science gateway creators using Jetstream as either the frontend or processor for scientific jobs
- STEM Educators teaching on a variety of subjects

# What Jetstream isn't...

- It's not traditional HPC
- There's no shared filesystem (think cloudy!)
- It isn't Amazon, Azure, or GCE (similar, but...)

# HPC vs Cloud

Adapting to a different environment:

- No reservations, no queueing – more interactive usage
- Being your own admin – hey, we have root!\*\*
- You really can have almost any (linux) software you want\*\*

\*\* Here there be dragons...

# Jetstream and the way of the cloud...

- **Cloudy Technologies:** clouds are more than just virtual machines (VM)
- **Old way:** robust (expensive) infrastructure, weak (cheap) software
  - You expect the hardware to not fail
  - State is maintained in volatile data structures
- **Cloudy way:** commodity infrastructure, robust software
  - Expect & plan for infrastructure to fail
  - Put intelligence into the software to handle infrastructure failure
- **And my favorite...**

# Thinking about VMs...

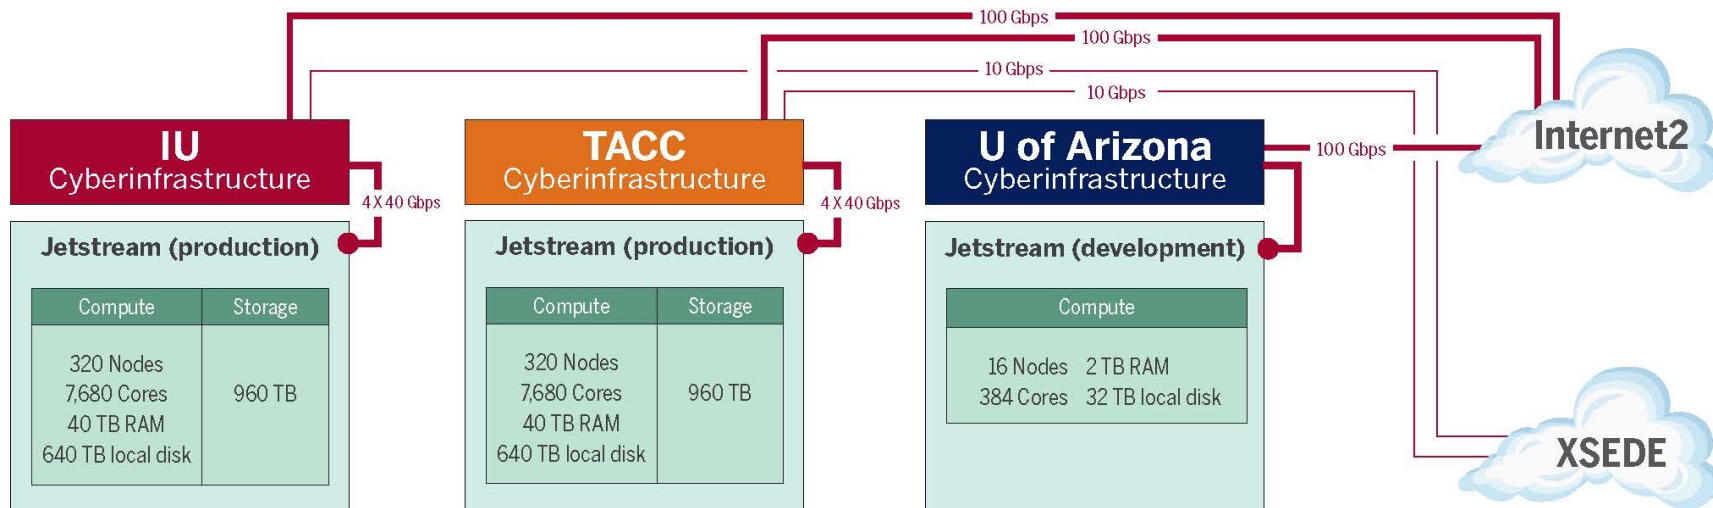

Cows, not pets: pets take great amount of care, feeding, and you name them; cows you intend to have high turnover and you give them numbers.

-- Mike Lowe (Jetstream architect)

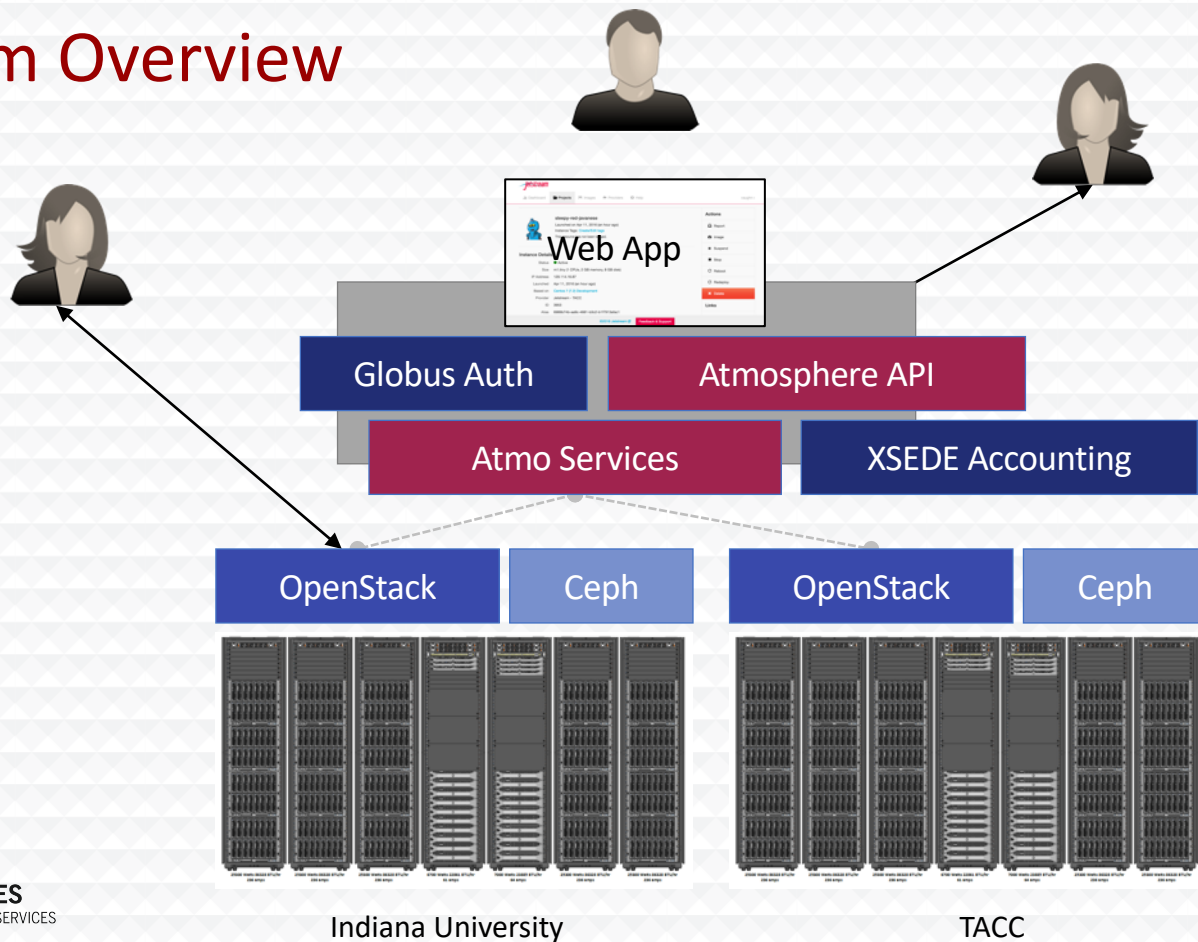

\*\*some caveats for gateways...

# Jetstream System Overview

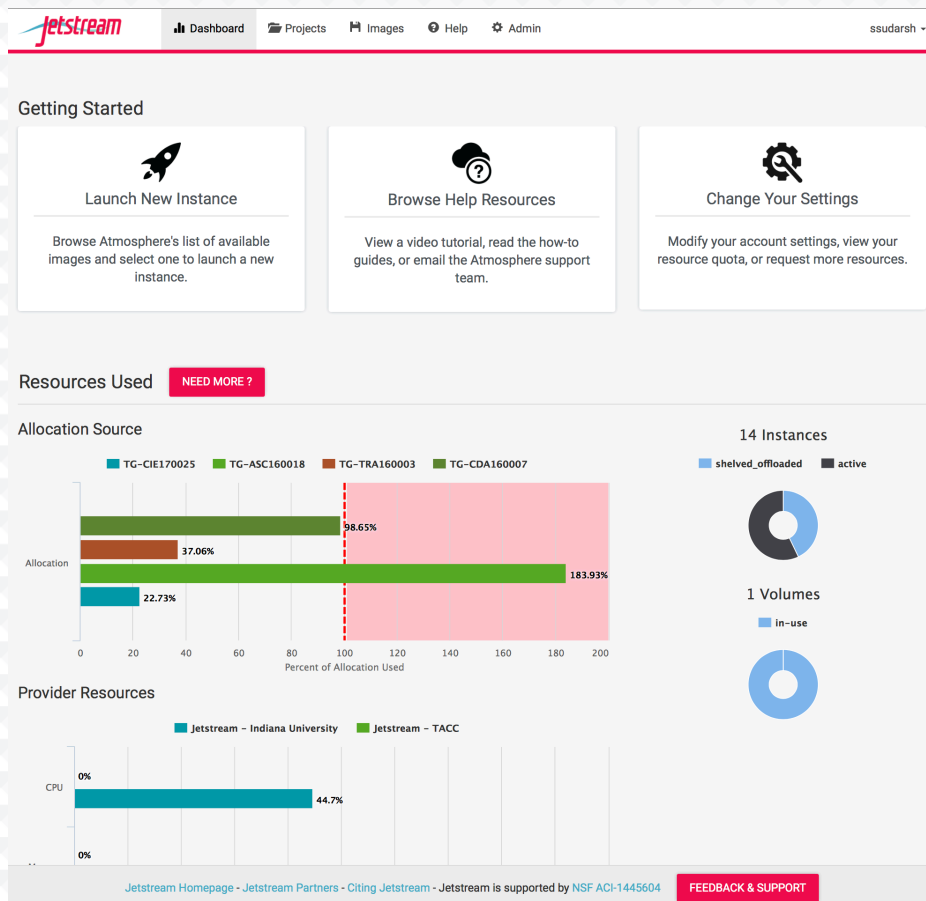

# Platform Overview

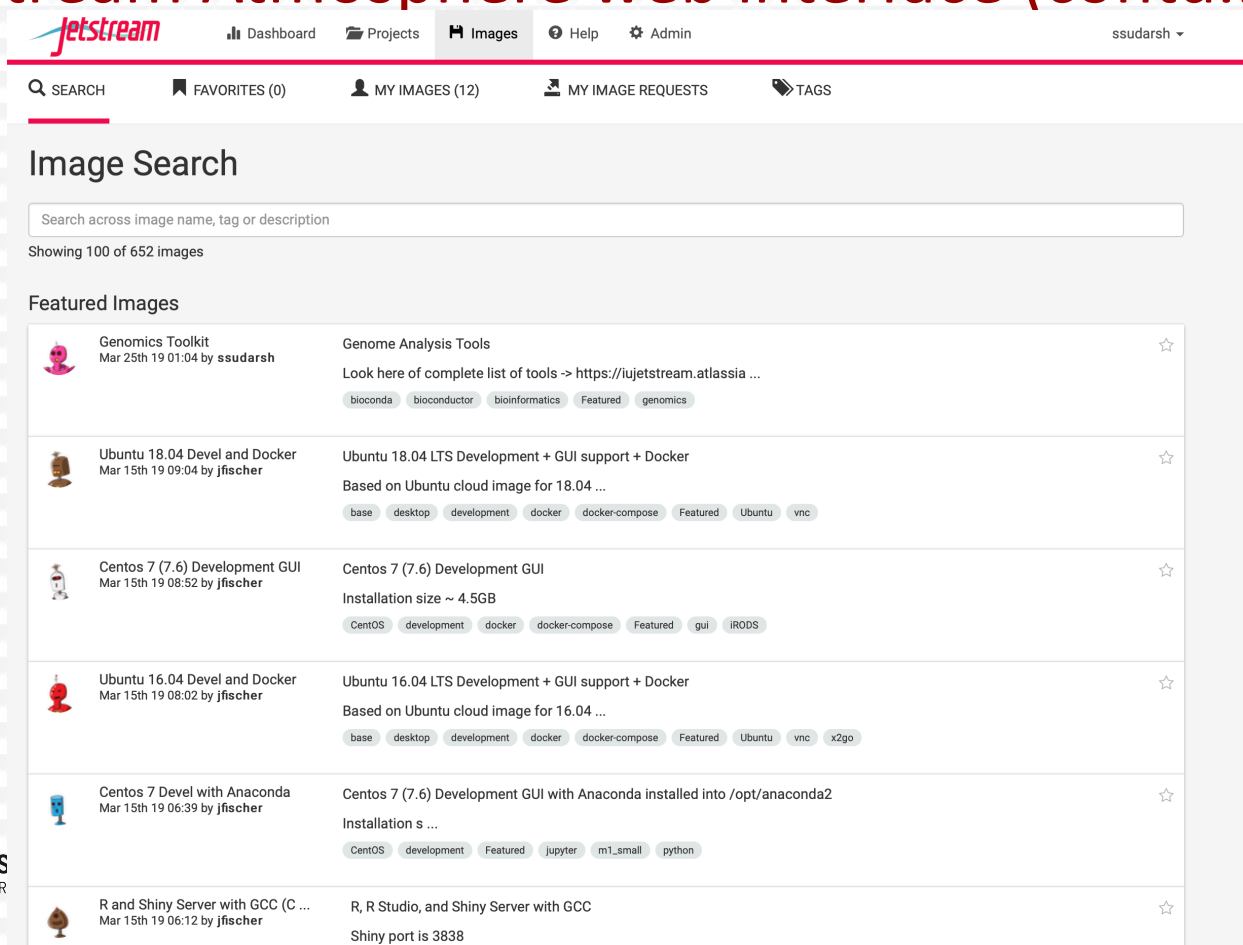

# The Jetstream Atmosphere web interface

# The Jetstream Atmosphere web interface (contd..)

The screenshot displays the Jetstream Atmosphere web interface. At the top, there is a navigation bar with the Jetstream logo and links for Dashboard, Projects, Images (selected), Help, and Admin. The user 'ssudarsh' is logged in. Below the navigation bar is a search bar and links for FAVORITES (0), MY IMAGES (12), MY IMAGE REQUESTS, and TAGS. The main section is titled 'Image Search' and contains a search input field with the placeholder text 'Search across image name, tag or description'. Below the search bar, it says 'Showing 100 of 652 images'. The 'Featured Images' section lists six featured images, each with a thumbnail, title, description, and tags.

# Look! It's more Jetstream web interface!

The screenshot displays the Jetstream web interface with a modal dialog titled "Launch an Instance / Basic Options". The dialog is divided into two main sections: "Basic Info" and "Resources".

**Basic Info:**

- Instance Name:** Centos 7 (7\_6) Development GUI
- Base Image Version:** 1.36
- Project:** ECR

**Resources:**

- Allocation Source:** TG-TRA160003
- Provider:** Jetstream - TACC
- Instance Size:** A dropdown menu is open, showing a list of instance sizes. The selected option is "m1.tiny (CPU: 1, Mem: 2 GB, Disk: 8 GB)". Other options include m1.small, m1.quad, m1.medium, m1.large, s1.large, m1.xlarge, s1.xlarge, m1.xxlarge, and s1.xxlarge.

At the bottom of the dialog, there is a link for "Advanced Options" (with a gear icon), a "CANCEL" button, and a "LAUNCH INSTANCE" button.

In the background, the Jetstream dashboard is visible, showing a sidebar with "SEARCH", "Projects", "Images", "Help", and "Admin". The main content area shows a list of versions for "Centos 7 (7\_6)", including version 1.36 (Mar 15th 19, 08:55), 1.35 (Feb 2nd 19, 04:20), 1.34 (Dec 4th 18, 06:48), and 1.33 (Oct 25th 18, 10:45). Each version entry includes an "Edit Version" link.

# Jetstream Web Desktop

# Hardware and Instance “Flavors”

Flavor	vCPUs	RAM	Storage	Per Node
tiny	1	2	8	46
small	2	4	20	23
quad	4	10	20	11
medium	6	16	60	7
large	10	30	120/60*	4
xlarge	24	60	240/60*	2
xxlarge	44	120	480/60*	1

\*\* s1.\* storage-rich instances are not eligible to be saved into a customized image

- Short-term *ephemeral* storage comes as part of launched instance
- Long-term storage is XSEDE-allocated
- Implemented as OpenStack Volumes and object storage
- Default storage is modest, but more is available via allocation

# Newly available on Jetstream:

- 6 Dell C4140 nodes with 4 NVIDIA 16GB V100 GPUs each
- GPUs are portioned into  $\frac{1}{2}$ ,  $\frac{1}{4}$ , and whole GPU and assigned to a vm
- CUDA enabled codes run accelerated and unmodified
- Card memory is divided and you have access to all the CUDA cores during your timeslices

## Caveats

- Not accessible from Atmosphere
- Must use specialized drivers from us that match underlying hypervisor
- Live migration restrictions and limited numbers mean more interruptions than the rest of

Jetstream

**RESEARCH TECHNOLOGIES**  
UNIVERSITY INFORMATION TECHNOLOGY SERVICES

# Using Jetstream VMs

Manipulating Jetstream VMs:

- Jetstream Atmosphere web interface
- Direct API access via OpenStack command line or Horizon access
  - API access enables Science Gateways and other always on services or on demand use cases; e.g. elastic compute techniques

Primary methods of logging into Jetstream VMs to work

- Interactive user access via web interface with VNC/SSH
- Direct VNC/SSH to individual instances

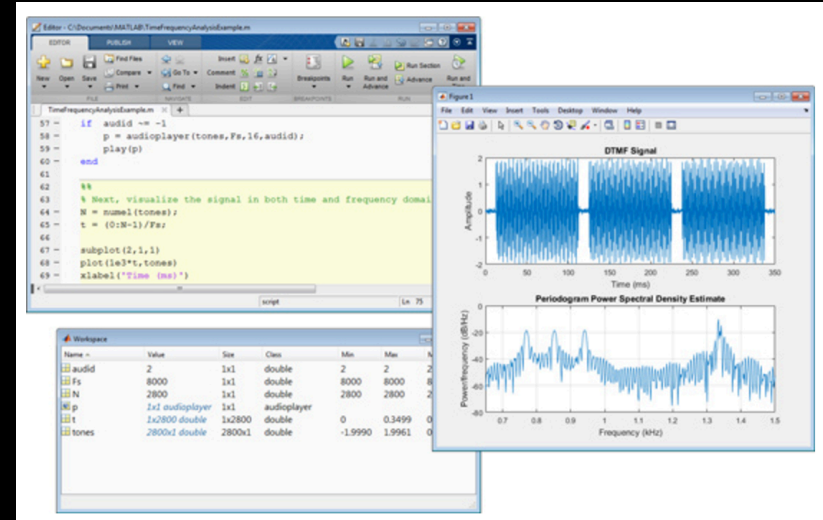

Discipline or area of interest	#of Jetstream allocations	SUs allocated on Jetstream	SU increase/Decrease on Jetstream over previous year	% of SUs allocated on Jetstream	% of all SUs allocated on other XSEDE- supported systems
Behavioral Sciences	6	3,465,516	100%	4.24%	0.61%
Biological Sciences	89	15,041,928	72.18%	18.40%	3.59%
Biophysics	86	3,627,026	44.15%	4.44%	13.56%

Neuroscience	19	4,708,180	327.87%	5.76%	1.98%
Physics	10	2,440,581	15.58%	2.99%	8.65%
Social Sciences and Humanities	28	2,409,633	192.27%	2.95%	0.81%

# Jetstream for engineering researchers (and others)

- Matlab and Simulink and additional toolkits are installed on Jetstream
- You do NOT need to have a local license to use MATLAB on Jetstream
- If you are a researcher that uses MATLAB or Simulink... you're ready to go!
- If you are an engineering researcher, and you need other tools... Let us know!

# Not just the usual suspects...

Physics, chemistry, and other “usual” HPC suspects are represented, but Jetstream also is home to projects on:

- Financial analysis / Economics
- Political science
- Humanities / Text analysis
- Network analysis
- Computer Science / Machine learning
- Satellite data analysis

# Jetstream for Education

- Jetstream has been used in multiple graduate and undergraduate courses
- Management, Access, and Use of Big and Complex Data
- Multiple informatics and general bioinformatics courses
- Business Intelligence (big data and analysis)
- Research Topics in Music
- Multiple genetics and sequencing courses
- Multiple information security and assurance courses

Research Data Alliance workshops, Galaxy workshops, data analysis in finance using R, security and intrusion detection, and principles in cloud computing...

# Galaxy riding Jetstream

Galaxy, a platform for biomedical research, focused on accessibility, transparency and reproducibility

- usegalaxy.org has more than 100,000 registered users executing 300,000+ jobs each month
- Many users need more capacity than the public quota, or other customizations

## Use Jetstream as a bursting platform

- From Galaxy Main, send jobs to a Slurm cluster running on Jetstream
- Run Galaxy Interactive Environments (Jupyter/RStudio containers) via a Swarm cluster running on Jetstream

## Use Jetstream as a self-service platform

- Pre-built Galaxy image configured with hundreds of tools and access to TBs of genomic reference data, available via the self-launch model within minutes
- Allows users to acquire (free) resources, and gives them complete control

# Jetstream Gateway Highlights

- **Simulations of Nanoscale Biomolecular Systems** - Aleksei Aksimentiev, University of Illinois Champaign-Urbana
- **The Neuroscience Gateway** - Amitava Majumdar, University of California, San Diego
- **Parallelizing Development of Immunomics and Genomics Tools** - Ramy Arnaout, Beth Israel Deaconess Medical Center
- **Atmospheric Science in the Cloud: Enabling Data-Proximate Science** – Mohan Ramamurthy, UNIDATA (University Corporation for Atmospheric Research)
- **Science and Engineering Applications Grid (SEAGrid): A Gateway for Simulation of Molecular and Material Structures and Dynamics** – Sudhakar Pamidighantam, Indiana University

And others!

IRIS Earthquake Browser

## GAMESS

(The General Atomic and Molecular Electronic Structure System) is a quantum chemistry package.

# Jetstream REU Program

NSF Supplement for undergraduates

- 4 students participated in 2017
- 6 students participated in 2018
- 7 students participated in 2019

- REU student videos on YouTube  
<https://www.youtube.com/user/IUPTI>

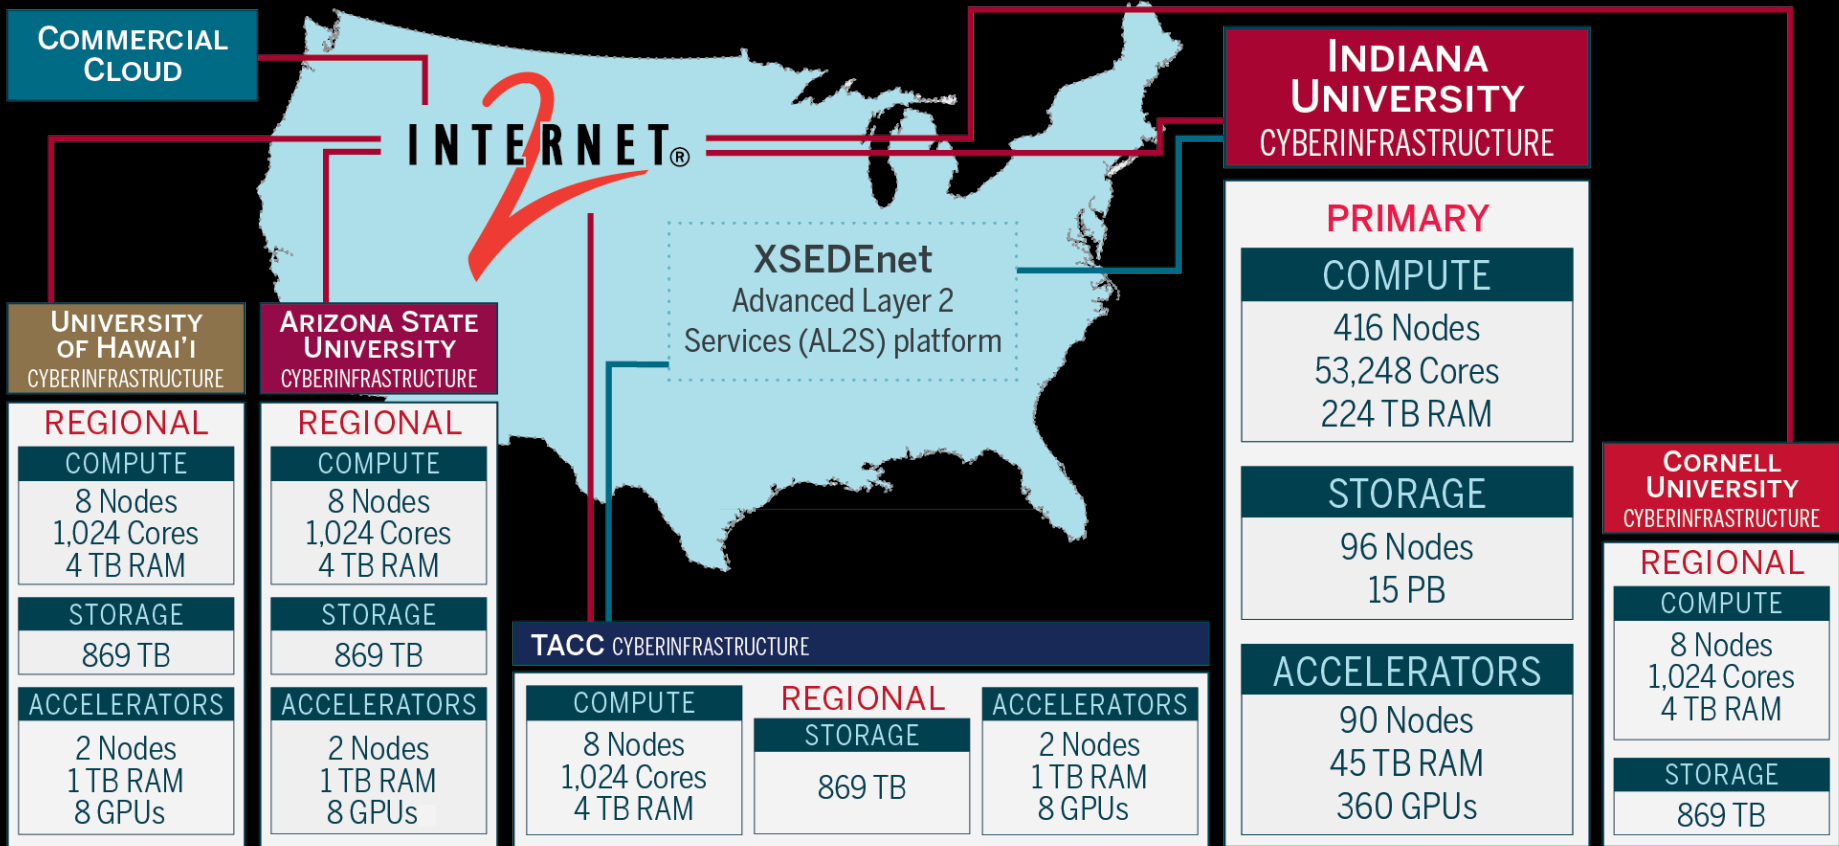

**RESEARCH TECHNOLOGIES**  
UNIVERSITY INFORMATION TECHNOLOGY SERVICES

# Jetstream usage highlights – 1 Jan 2021

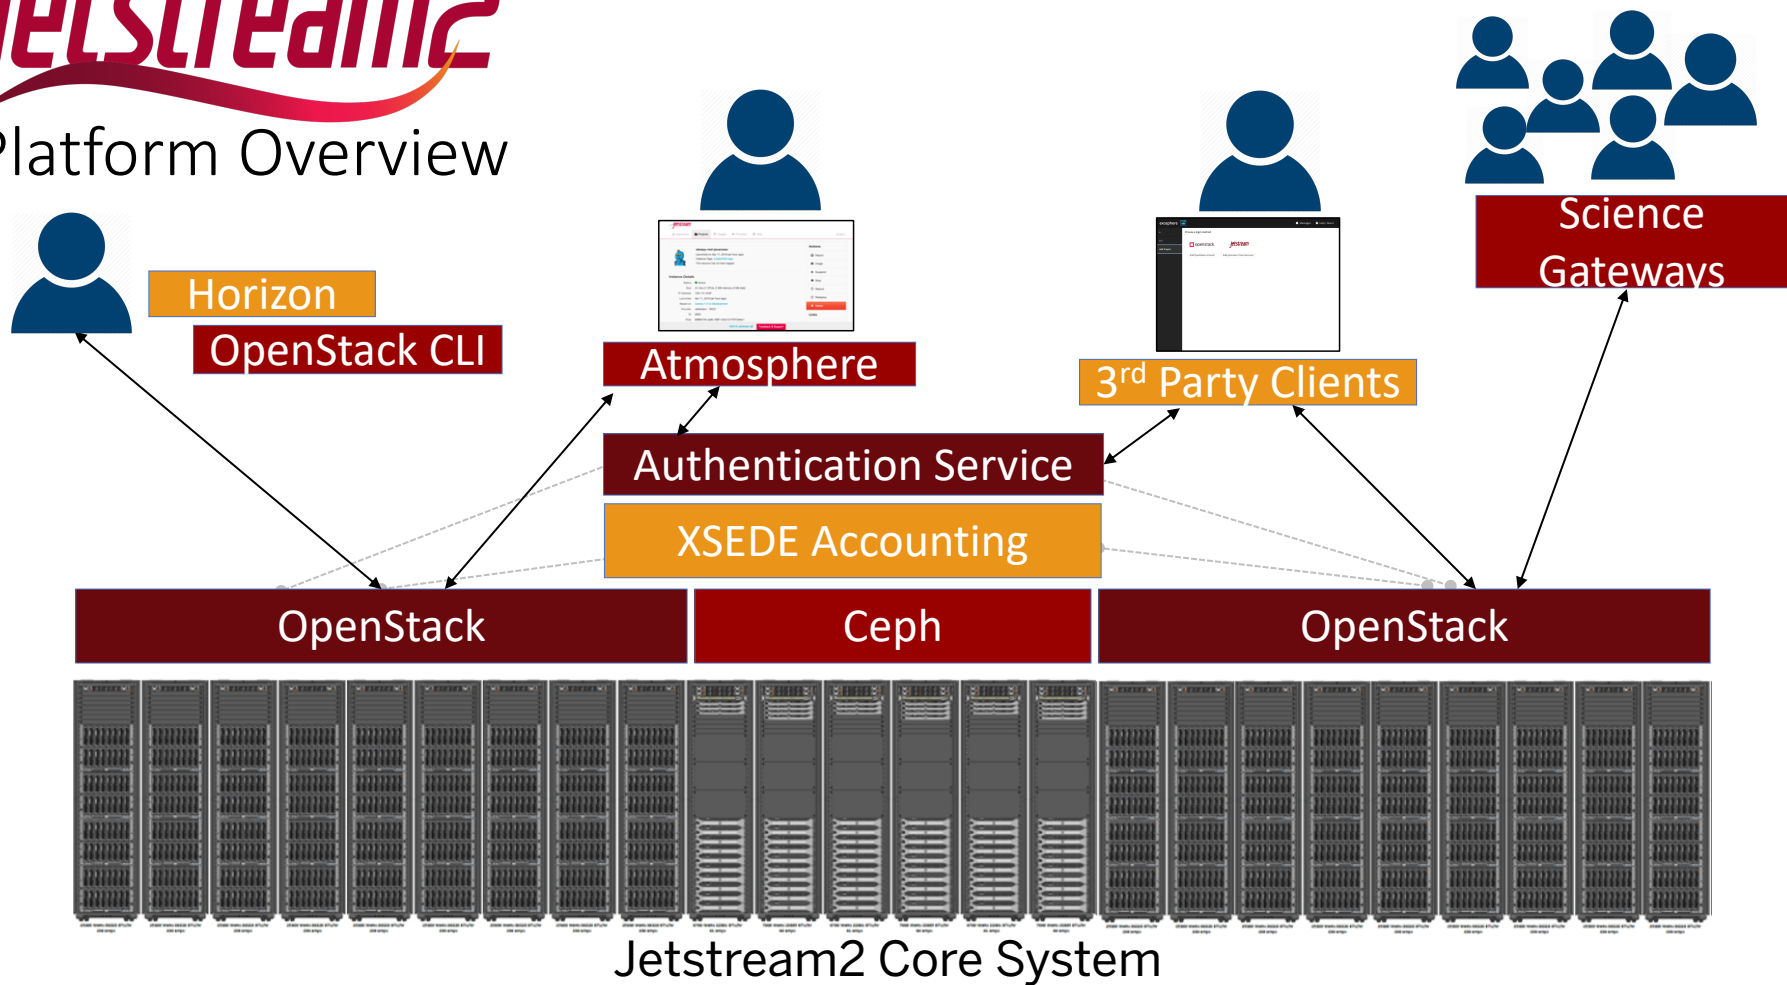

- 395 active XSEDE projects covering 56 fields of science and over 2400 **active users** representing **405 institutions**
- **80%** of Jetstream users have **not used any other XSEDE system**
- >373M CPU hours allocated to XSEDE projects since June 2016
- 49 active science gateways
- 46 education/teaching allocations serving over 850 students
- 1189 mean active VMs in previous qtr, 1632 peak active VM count
- **Highest** user satisfaction in most recent XSEDE survey

# Jetstream2

## Platform Overview

# Timeline

- Jetstream now in 5th year of operations
- Jetstream extension requested through November 2021
- Jetstream2
  - Early operations planned for August 2021
  - Production operations by October 2021

Flickr user Oiluj Samall Zeid - Lejos de Yulín

# Requesting access to Jetstream

- Trial allocations available **TODAY**
  - <http://wiki.jetstream-cloud.org/Jetstream+Trial+Access+Allocation>
- You can request **startup** allocations **anytime**. (Startups are simple!)
- <http://wiki.jetstream-cloud.org/Jetstream+Allocations>
- You can request allocations for **educational** use **anytime**
- Next submission period for large allocations is 15 Mar 2020 – 15 Apr 2020
- Research allocation: Project desc (<10 pages) and Scaling doc (<5 pages)

**We can help!**

# Where can I get help?
